

To support our wide range of specialised camera facilities provision, ACS owns and operates a large vehicle fleet from HD OB operator units to 4x4 camera trackers, people carriers and dedicated support tenders. ACS also has experienced transport partners to enable the business to meet peaks in demand ensuring that equipment and crew always get to site safely and on schedule wherever the location.

OB VEHICLES

ACS has a range of customised OB operating vehicles designed to allow full integration of ACS camera facilities into the Outside Broadcast environment. The vehicles have provision for multiple remote camera operation as well as engineering capabilities and are all configured for high definition operation.

Further information available on request.

TRACKING 4X4

Built for operation in a range of adverse terrains, the Landrover camera tracking 4x4 vehicles are primarily configured for use in the coverage of horseracing, providing dynamic, exciting coverage and are an essential camera angle in the broadcasting of the sport. The vehicles are able to carry up to two stabilised camera mounts and operators with a number of camera position seating options available.
