

# ACS Aerial Camera Systems

the world's **leading specialist**  
**camera** company

## WESCAM 24 HD

A renowned gyro stabilised aerial filming platform, the Wescam 24 which has been fully upgraded to HD is a cost effective solution for HD filming. The system is fully ITAR compliant and can be used in territories where restrictions would normally apply. Designed primarily for the air, the Wescam 24 is highly versatile and can be used on many types of moving platforms from boats and tracking vehicles to railcams and wire systems.

Fitted with a Sony HD F950 camera, the system is a reliable and trusted mount which can integrate readily into any HD production and offers real value for money.
