

ACS SMARTHead3™

Debuting at the Sochi Winter Olympics 2014, SMARTHead3™ is the latest addition to ACS' family of advanced remote heads.

Designed and built in-house, SMARTHead3™ has been created to fulfill the growing demand for a compact remote head system capable of handling a much wider range of camera and lens combinations whilst maintaining the range of control features, reliability and high performance standards associated with ACS SMARTHeads™.

Key features of SMARTHead3™ include:

- Significantly increased payload capacity
- Highly versatile and capable of handling a varied range of remote head applications e.g Beautycams, 2/3" box zoom lenses (Canon 25x, 86x, 100x), large lens format digital film cameras (e.g Sony F55)
- Compact, low profile design minimises space requirements and potential line of sight issues
- Extremely high control performance even when fully zoomed in with a 100x lens (with doubler)
- Based on proven SMARTHead™ technology
- Environmentally sealed for protection in adverse weather conditions
- Remote switching of lens features e.g. lens doubler, lens stabiliser etc
- Multi-camera operation capability
